Profile

Passionate about the software field, I am actively seeking opportunities that challenge my development skills, allowing me to grow as an engineer. I hold a strong appreciation for companies that foster a positive and collaborative culture, as I firmly believe it enhances both personal and team growth.

Skills

Languages & Tools: Golang | Python | React | Next.js | TypeScript | SQL | Bash | Git
General: Analytical | Team player | Research-oriented | Great Communicator
Technical: Git workflows | Agile development | RESTful architecture | Jira | Google Cloud Platform

Experience

Bitly November 2022 - Present

Intern - Software Engineer II

- Implement REST services in a microservices architecture.
- Create automated unit and integration tests.
- Assist in the migration of Python-based services to Golang.
- Configure Next.js back-end server handling for tech stack transition.
- Git, Jira, and Slack for version control, issue tracking, and communication.

United States Air Force March 2016 - March 2020

Aircraft Armament Systems

- Managed and maintained aircraft bomb, rocket, and missile release systems, guns, and munitions handling equipment on the F-15 fighter jet.

Education

Wake Technical Community College (Raleigh, NC)
AAS in Computer Programming and Development

August 2020 - December 2022
GPA: 4.0

Projects

National Association of Orthopaedic Technologists | Github: <https://alexcod.es/naot> | Site: <https://mynaot.com>

- DNS settings and domain email marketing setup for seamless online presence and effective communication.
- Next.js and MaterialUI website with automated Netlify deployment.
- Stripe integration for secure and reliable 3rd party payment processing.

United House Productions (Server) | Github: <https://alexcod.es/uhp-server>

- Go RESTful API, Dockerized for easy deployment, and secure merchandise purchasing with Stripe

United House Productions (Client) | Github: <https://alexcod.es/uhp-client> | Site: <https://unitedhouseproductions.com>

- UI built with React, integrated with Contentful CMS, and hosted through Amazon S3.
